## Hardware Packs for Side Hinged Doors

### Traditional Pack

2 no pair of galvanised 24" heavy duty hooks and bands  
1 no pair of garage door stays  
1 no top bow handle bolt, 1 no foot bolt  
1 no Yale lock with finger pull  
all complete with fixing screws and bolts

### Modern Pack

3 no pair of stainless steel 4" butt hinges  
1 no pair of garage door stays  
1 no top bow handle bolt, 1 no foot bolt  
1 no Yale lock with finger pull  
all complete with fixing screws and bolts

### Antique Pack

2 no pair of 18" black antique tee hinges  
1 no pair of garage door stays  
1 no top bow handle bolt, 1 no foot bolt  
1 no Yale lock with finger pull  
all complete with fixing screws and bolts

**Locking** is optional **£150.00 Nett**

### Colour Options

The colours below are for the Factory fully finishing option which will give the door a hard satin long lasting finish that could last up to 2 years before recoating (depending on position and location of door)

Light Oak

Medium Oak

Golden Oak

Dark Oak

Mahogany

Rosewood

Teak

Ebony

Walnut

Note; Due to Cedar natural shading and colouring such colours will vary. Photographic and printing processes make it impossible to guarantee colours from this brochure, and are intended as a guide only. We would therefore advise you to ask for actual colour samples.

Factory Fully Finishing	Doors up to 9ft	Doors from 9ft to 18ft	Frames up to 9ft	Frames from 9ft - 18ft
Our standard colours as above	164.00	322.00	68.00	92.00
White and grey primed	239.00	475.00	98.00	146.00
RAL/BS colour ranges	399.00	798.00	133.00	174.00
NB. Ebony/Black priced as RAL 9005 not included in our standard colours.				

# DOOR SPECIFICATION AND WARRANTY

## TRADITIONAL

All the traditional Up and Over, Side hinged and Sectional range of doors are manufactured from the finest grade of Kiln Dried Western Red Cedar selected and crafted using traditional door construction methods and joints, i.e. mortice and tenon, glued and wedged on all structural timbers to give strength and a long lasting service, proven over many years of door manufacturing. All top, middle and bottom rails are solid Cedar, finished to a thickness with nominal width sizes to suit the size of door, on doors over 8'0 x 7'0 may have lateral and vertical timber or steel bracings (with the exception of side hinged doors) to give strength and stability to the door also to minimise bowing and deflection to the door when in an over-head position.

## SHERWOOD

Sherwood range of timber doors are manufactured using selected kiln dried 16mm Cedar facings glue bonded on to 6mm exterior plywood backing sheets of nominal widths to suit door size and style. They are then mounted into a pre-finished Aluminium boundary frame with steel lateral bracings to reinforce the strength of the panel.

## GLAZING

Glazing in Traditional doors is of 4mm safety glass in plain, stippled pattern with either plain, diamond or square leaded design. In Sherwood doors it is of Acrylic pvc sheet in either plain or stippled.

## IMAGES

All door images in this brochure are of 7'0 x 7'0 (2134 x 2134) single size doors, on larger doors some rail sizes and panel configurations may change.

## PRODUCT CARE AND FINISHING INSTRUCTIONS

**Timber** is an organic substrate material with natural characteristics than can acclimitise itself, no matter the "species" to different environmental conditions prevailing in its localised "fixing or place". Therefore the company "**CEDAR DOOR**" accepts no liability or responsibility for variations occurring in our "Timber" products supplied, in any of the following descriptions i.e. "colour variations, movement either lateral or longitudinal, splitting, shakes, water damage ingress or exit, resin exudations or chemical spillages.

- Conversely **Timber** substrates can naturally expand and contract according to environmental conditions.
- Moisture content and humidity may open and close joints and some minor curvature may occur.
- Any curvatures that occur however, will not affect the long term performance or life of this natural material.

Please note: **Cedar** is organically grown with natural colour and grain variations, this is a feature of **Cedar**. We make every effort to harmonise the effect by hand matching all components part used in manufacture.

### Protection (Basecoat)

All timber doors and components are supplied with a dip immersion coat of Remmers Induline GW306 colour ref: 006 light oak; this operation is for temporary protection for transit and installation purposes only.

Fully finishing of garage doors is available at an extra cost. If our product becomes exposed to excessive water splashes or rain it may result in water marks or stains which could affect the final coatings of the door. We recommend that the product receives a full specification of finishing coats immediately after installation to all surfaces with a Remmers Finishing coat system, all to the coatings manufacturer's instructions.

### Full Factory Finishing Option

The full factory option is supplied in various coloured woodstains and will provide a 2 year erosion period. If the door becomes affected by rain soon after installation you may notice a light coloured staining on the finish of the door but will disappear when dry this is caused by the curing process of the Remmers Induline LW700 which will disperse and disappear once fully cured which can usually take anything up to six months depending on many parameters. Humidity and weather conditions has no adverse effect to the quality and finish of the door.

- Consideration should be taken into the selection of the final colour of the door in certain compass locations i.e. the selection of dark colours for doors (south facing or in constant direct sunlight) could result in a excessive heat uptake into the substrate causing excessive extracting of moisture content (drying and effect) resulting in abnormal distortion of the door.

### Storage

- All doors are delivered with a polythene shrink-wrap protection which should be left on just prior to site coatings applications.
- Do not puncture the polythene shrink-wrap before installation.
- Prior to installation doors must not be stored in direct sunlight.
- Do not expose the doors to water contamination of any description/or staining may result.
- This does not apply to fully finished doors.
- Door must always be stored in an upright position and protected from site and weather contaminations before fixing.

### Quality Check

Timber is a natural material, defects i.e. small knots, close wide or short grain, surface shakes or splits or grain lift, although we endeavour to eliminate most of these phenomena in production, some may still appear after installation. The company (**CEDAR DOOR**) cannot be held responsible for any defect (Naturally Occurring) after installation.

- A visual quality control check of every door supplied by (**CEDAR DOOR**) is carried out before supply.
- The (CUSTOMER) should carry out in natural daylight (THEIR OWN VISUAL INSPECTION) prior to installation.
- Stand at a distance of 3 metres (10 feet) to view the overall appearance. The door is acceptable if, taking into account the facts below, none of the following is readily visible on the face of the doors from this distance.
- Marks or distortion associated with the manufacturing process.
- Vertical and lateral deflection may occur up to 1" (25mm) on door up to 8ft wide/height and 21½" (60mm) on doors up to 16ft wide.
- Minor indentations, marks or scuffs on the surface.
- Minor paint or stain blemishes.
- Any defect/anomaly must be reported to (**CEDAR DOOR**) within 48 hours of goods received.

# Door Gear Specification

## CEDAR CD 100 RETRACTABLE DOOR GEAR

CD100 Gear has the advantage of maximum clearance on frame opening width at average door mirror height i.e. drive through width, and the lower weather strip is of soft rubber, therefore avoiding any damage up to frame opening width. With a multi spring unit at high level with finger safe springs, with a choice of two types of locking handles, available on most doors up to 2438 (8ft) wide or 45kg (100lb).

## CD 150/200/250

These gears are based on the traditional retractable gearing available on garage doors. Our latest design has a number of benefits: all parts are rust protected with either galvanised or zinc plating for lasting looks, all bearings surfaces are made of nylon for very low maintenance, long lasting reliability and smooth running, even our springs are galvanised. All doors fitted with the above operating gears come supplied with the top roller brackets and weather strips are pre-fitted to the door for ease of installation.

## CEDAR CANOPY OPERATING GEAR

Doors specified with canopy operating gear come complete with the gear pre-fitted to the door for quick and easy installation.

The latest canopy gear is very robust and has a number of benefits, a well balanced overhead torsion spring with 3mm cone and cables including an anti-drop system to prevent door dropping in the event of a cable or spring break, a strong 'U' steel section joins the door arm to the roller and spindle giving the whole door a rigid feel. Our rollers are of a large diameter for smoother running and improved location. Security has been well thought out with 3 point locking and 2 roller security brackets meaning that a closed and locked door has 5 effective fixed positions.

## CE and CPD Compliance

All our timber doors and hardware meet to latest CE and CPD demands.

## Comparison Chart, showing clear opening widths CD100 & CD150-250

Note: The chart below is based on a 7'0 x 7'0 (2134 x 2134) door, the thickness of the door will also reduce the opening height i.e. door up to 8ft (2438) wide = 80mm, 10ft (3040) 120mm 16ft (4870) 155mm on all solid timber doors, 85mm on all Sherwood doors.
